The IEEE Asia Pacific Conference on Circuits and Systems (APCCAS) is the regional flagship conference of the IEEE Circuits and Systems Society in Asia and Pacific Region. APCCAS 2020 will be **held in Ha Long Bay - a UNESCO World Heritage Site of Vietnam - during 8-11 December 2020**. Vietnam has drawn more visitors than any other countries in Southeast Asia, which is a result of its alluring range of breathtaking natural splendors, temples and age-old ruins, delectable cuisine and legendary Vietnamese hospitality.

CALL FOR PAPERS

The APCCAS is a major international forum for researchers, scientists, educators, students and engineers to exchange their latest findings in circuits and systems. It covers a wide range of topics including, but not limited to the following:

- Analog and Mixed-Signal Circuits and Systems
- Digital Circuits and Systems
- Power/Energy Devices, Circuits and Systems
- Communication Circuits and Systems
- High-Speed and Optical Wire-lined Circuits and Systems
- Biomedical and Healthcare Circuits and Systems
- Digital Signal Processing
- Sensors and Interfaces
- Design Automation
- Nano-electronics, Devices and System Integration
- Neural Networks and Neuromorphic Engineering
- Nonlinear Systems and Circuit Theory
- Visual Signal Processing and Communications
- Multimedia Systems and Applications
- Education in Circuits and Systems

Publication:

After a careful reviewing process, all accepted papers accompanied with proper registration and presentation, will be published in the APCCAS 2020 Conference Proceedings, which will be published by IEEE and being archived into **IEEE Xplore**. Selected excellent papers will be invited for possible publication in **IEEE Transactions on Circuits and Systems I**.
